

PartSmart™

**Find the Right Part,
the First Time,
with PartSmart**

at a glance

PartSmart™ electronic parts and service catalogs will save you time and money when it comes to repairing equipment. The simple design allows users to quickly learn how to find the right part the first time.

■ Search Tools... PartSmart searching is extremely powerful and easy to use. Search by model name or model numbers, part numbers, part descriptions and get immediate results. Some manufacturers also provide attribute searching, allowing you to enter combinations of criteria such as color, horsepower, year, displacement, dimensions, weight, VIN or vendor to help identify the equipment you are repairing.

■ Locate where parts are used... PartSmart allows you to search an entire manufacturer's catalog to find all the models/components where a part is used.

■ Create a list of parts... PartSmart lets you create, save or transfer a list of selected items by double clicking or "drag and drop" methods.

■ Easy to read... PartSmart allows users the ability to enlarge images, clarifying small, hard-to-read text and illustration details.

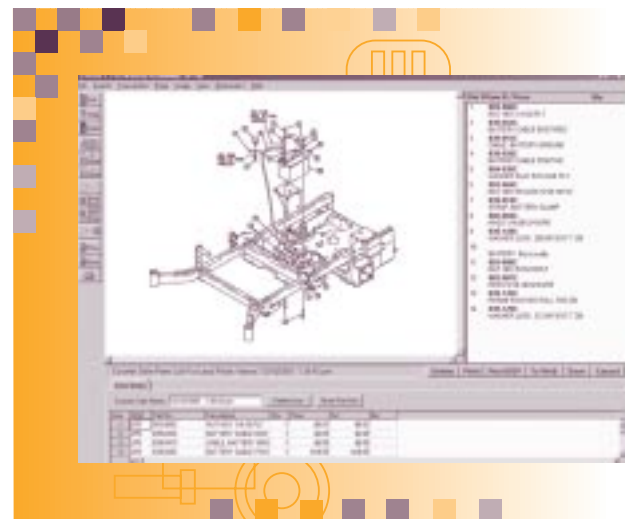

■ Access to accurate and current information... PartSmart subscriptions ensure that your parts catalogs and service information is always up-to-date by providing scheduled updates.

■ Supersession information allows you to easily identify parts that can be substituted.

■ Compare one model or assembly against another model or assembly... this allows you to easily identify differences between models.

■ Integrate PartSmart with a computer system supporting your business... Transfer Pick Lists into Sales Orders, Warranty Claims, or Purchase Orders. PartSmart also allows on hand inventory, price information, and bin location from your Business Management System to display within PartSmart.

■ Use the power of the Internet... send Pick Lists to Web order forms and retrieve price files to update prices in PartSmart.

PartSmart

EXCEPTIONAL FEATURES

Access your leading suppliers catalogs...

PartSmart software is used by over 50 manufacturers. No more need to learn a different software for each supplier. The same commands, the same look and feel for ALL your important manufacturers.

Print or Fax Illustrations, Parts Lists, or Pick Lists...

PartSmart provides a convenient way for you to print or fax important information contained in the catalog.

Display data the way you want...

PartSmart lets you customize the way you view parts information on your computer screen. View the entire illustration or zoom in on selected areas for details.

Add your own User Notes...

PartSmart comes with manufacturer notes to support the catalog parts data. You can also add your own notes regarding installation, service techniques, cautions and related parts for your reference.
